

Vocational School for Nutrition and Domestic Economy

Assistants for nutrition and domestic economy

are experts for healthy nutrition and for working in an economic, efficient and ecoconscious way when housekeeping, preparing food and when working in the service sector.

A further area of focus is when you care for various groups of people e.g. home care or caring for people in the agricultural sector or in welfare institutions and of course in the hotel and food service industry.

Duration of training: 2 – 3 years.

Full-time education at a vocational school/internship

Qualification: EQR 4

Professional Academy for Nutrition and Health Care Management

Business economists for nutrition and health care management

You are required to have completed your vocational training in domestic economy before participating in further education at this academy.

The graduates compile menus, organise the procedure in the kitchen, plan the personnel requirements. All of the above, of course in compliance with hygienic and quality standards. Furthermore, they instruct apprentices etc.

The graduation at bachelor level qualifies you to instruct apprentices and it also allows you to apply at a university of applied science.

Business economists for nutrition and health care management take on managerial duties in middle management e.g. as a hygiene officer, project manager, event coordinator, head of housekeeping in a hotel.

Duration of training: 3 years:

- Full-time education at a vocational school/theory and practice for 2 years
- 1 year on-the-job training in the company

Qualification: EQR 6

Vocational School for Child Care

Childcare assistants

work in various socio-pedagogical fields but predominantly take care of and educate children from infancy to early school age. You normally work in a kindergarten or a daycare centre.

Your areas of responsibility are diverse. You supervise, play, make music and make things with children

Furthermore, you give the parents feedback about how their children are developing and you take on domestic chores.

Duration of training: 2 years

Full-time education at a vocational school/theory and practice

Qualification: EQR 4

Professional Academy for Social Pedagogy

Nursery school teachers

You are required to have completed your vocational training in child care before participating in further education at this academy.

The professional academy for social pedagogy offers you an advanced vocational and additional general education, in order to prepare you for a distinguished career as a nursery school teacher.

The content of the course is on the one hand pedagogical and psychological knowledge and on the other hand key competences related to practice e.g. conversation techniques or conflict management.

After finishing your training you get two entrance qualifications that entitle you to go to a university of applied science or a university.

The training enables the students to work independently in various socio-pedagogical areas. Among others they will be able to head a kindergarten or daycare centre or do public youth work.

Duration of training: 3 years

- Full-time education at a vocational school
- and 1 year in a socio-pedagogical institution e.g. kindergarten

Qualification: EQR 6

Upper Vocational School for Social Services

A levels after your vocational training

There are various ways to get your A levels in the Bavarian school system. One way is to go to an upper vocational school because these schools enable pupils who have finished their vocational training to get the entrance qualification for a university of applied science in one year (BOS 12).

If they stay one more year (BOS 13), they get a subject linked university entrance qualification. If they can verify knowledge in a second foreign language the pupils even get their higher education entrance qualification for every subject.

Depending on the entrance qualification the pupils can go to any university of applied science or any university. There's always a way to get your A levels.

- general entrance qualification for a university of applied science (Fachhochschulreife):
1 year
- subject linked university entrance qualification (fachgebundenes Abitur):
2 years
- general university entrance qualification (Abitur):
2 years

Vocational School - Dual Education Vocational Preparation

BIJ/k – Class - ESF-sponsored (vocational integration year)

The pupils don't have an apprenticeship agreement. In this class the pupils are helped to find an apprenticeship and when they eventually finish their training they get the equivalent of a secondary school certificate. The class is sponsored by the European Union.

- Full-time education at a vocational school/internship

BIK1 – Class (vocational integration class 1)

There are asylum seekers and EU-migrants in this class, who do not have an apprenticeship agreement. They get the opportunity to improve their German and reach level A2 of the European Framework.
